## SUMMARY OF QUALIFICATIONS

- Security Engineer with expertise in secure development, vulnerability assessment, and remediation strategies aligned with Owasp Top 10.
- Hands-on experience with Owasp Juice Shop, PortSwigger labs, TryHackMe, and real-world bug bounty platforms on HackerOne.
- Developed and contributed to various Cyber Security Projects addressing real-world security challenges.
- Strong knowledge of security tools, methodologies, and frameworks to enhance application security.

## EDUCATION

**Bihar Engineering University**, Patna

*Bachelor of Technology, Computer Science & Engineering*

Current CGPA: 8.1/10

June 2022 - Present

**Narayana PU College**, Bengaluru

*Class 12 CBSE*

81%

May 2020

**JSS Public School**, Bengaluru

*Class 10 CBSE*

86.8%

May 2018

## TECHNICAL SKILLS

**Languages:** C, C++, JavaScript, Python, SQL, Bash, Powershell

**Security Tools:** Burp Suite, SonarQube, Nmap, Wireshark, Metasploit, Nikto, Postman

**Frameworks:** Owasp Top 10, NIST, STRIDE, MITRE ATT&CK, ISO 27001

**Web Stack:** MongoDB, Express, Angular, NodeJS, Jasmine, AWS, VSCode, Github

**Operating System:** Windows, Kali Linux, Ubuntu

## SOFT SKILLS

Public-Speaking; Teamwork & Collaboration; Problem-Solving; Critical Thinking; Continuous Learning – the ability to learn, unlearn, and relearn.

## WORK EXPERIENCE

**HackerOne**

Security Researcher

Remote, India

April 2025 - Present

- Actively engaged in Bug Bounty Programs(BBPs) with a focus on web applications and source code review.
- Discovered and responsibly disclosed vulnerabilities including CSRF, XSS, metadata exposure and server misconfigurations.
- Utilized various security tools, browser plugins and custom scripts for reconnaissance and automated testing.

## CERTIFICATIONS

- Owasp Top 10 Security Threats – The Linux Foundation
- System & Usable Security – NPTEL
- Full Stack MEAN Developer – SimpliLearn

## PROJECTS

**Email Phishing Detection System**

[\[Code\]](#)

- Built a machine learning-based system to detect phishing emails and malicious URLs using NLP and classification algorithms.
- Trained and fine-tuned a BERT model for phishing email detection using NVIDIA CUDA on an RTX 2050 GPU
- Utilized Random Forest and XGBoost models for malicious URL classification inside email body.
- Enhanced email security by automating threat detection, reducing reliance on manual review and response.

**Automated Threat Intelligence Extraction**

[\[Code\]](#)

- Developed a Python-based tool to automate the extraction of cyber threat intelligence(CTI) from PDF reports.
- Extracted critical Indicators of Compromise(IoCs) and Tactics, Techniques, and Procedures(TTPs) using NLP.
- Converted unstructured threat data from Regex & APIs into insights, improving team efficiency and response.
- Improved accuracy and consistency of threat data extraction, reducing the risk of missed indicators during manual reviews.

**Packet Sniffer**

[\[Code\]](#)

- Developed a packet sniffer in Python using raw sockets to capture and parse Ethernet, IPv4, ICMP, TCP, and UDP packets.
- Designed the sniffer to operate at the data link layer, decoding and displaying information in a structured, human-readable format.
- Implemented custom packet parsers for core protocols, enhancing understanding of network traffic and protocol behavior.
- Built and tested the tool exclusively for Linux systems, utilizing administrative privileges for raw socket access.

## ACHIEVEMENTS

- Awarded a \$200 bounty for resolving an open issue in the TT-Metal project.
- Contributed to open source projects of OWASP and Tenstorrent on Github.
- Cleared both the qualifying and challenge rounds of HackITK.
- Achieved 'Apprentice' rank on PortSwigger Web Security Academy, solving 89 security labs.
- Ranked in the top 5% globally on TryHackMe.
- Received the Judges' Choice Award in a public speaking competition at Presidency College.
- Led my team as Vice Captain in the Jr. NBA Basketball competition.
