Summary

As a Cyber Security Enthusiast with hands-on experience, I'm eager to contribute to an organization that prioritizes cutting-edge security solutions. Motivated by solving complex problems, I thrive in challenging environments. With practical experience from Portswigger and TryHackMe Labs, as well as participation in CTF events like BugBase and HackTheBox, I bring a proactive approach to tackling security challenges. I am seeking an opportunity to further develop my expertise and contribute to the success of an innovative and forward-thinking team.

Skills

Language: C++, JavaScript, Python(Scripting)

Operating Systems: Windows, Kali Linux

Network Protocols: TCP/IP, UDP, DNS, DHCP

Pentesting: Burp Suite, Nmap, Metasploit, SqlMap, VirtualBox, Github

Technical: OWASP Top 10, Vulnerability Assessment, WAF, Encryption, Cryptography

SoftSkills: Critical Thinking, Time Management, Public Speaking, Teamwork, Continuous Learning

Experience

Tester - Quality Assurance | 07/2023 – 03/2024 | Taquino India Pvt. Ltd.

- Directed testing efforts for the Ed Tech startup's application, Institute Management System (IMS), and website, ensuring peak functionality and user satisfaction.
- Pioneered the integration of website and application data into the Institute Management System (IMS), utilizing DevOps principles to optimize data flow and enhance overall system efficiency.
- Led documentation and planning for IMS, which served as a vital reference for the development team and provided a comprehensive guide for clients.
- Successfully presented the Institute Management System (IMS) to clients, showcasing its features, benefits, and customization options. Received positive feedback, significantly contributing to elevated client satisfaction levels.

IT Systems Administration Intern | 09/2022 – 12/2022 | Orion Square

- Support Users for systems like Customer Relationship Management(CRM), Social media automation, Learning Management System(LMS) and time keeping for streamlining processes.
- Generate reports from these systems for making business decisions and import/export of all data from excel to these systems or vice versa.
- Manage Information access to all the above systems.
- Software on board: Vtiger, Zoho, Interspire, Cron Jobs, Moodle(PHP)
